Congreso  
**Aapresid**

Un congreso a suelo abierto

## ¿What are the topics?

- **Technologies for no-tillage (NT) production:** latest advances in machinery, seeds and inputs.
- **Strategies and technologies of crop management** (corn, soybean, sunflower, wheat, barley, cover crops and more): intensification and diversification of rotations, nutrition, pest management, information management, profitability, etc.
- **NT livestock systems:** integration with agriculture, regenerative livestock farming, carbon neutral systems.
- **Resistant pests:** challenges and tools for their management.
- **Agriculture and climate change:** production experiences in aggressive environments.
- **Agroecology:** wildlife corridors, multifunctional landscapes, alternative productions

## And much more:

- Agtechs
- Bioenergy
- Carbon and GHG emissions in agriculture: Latin America's position in the global scenario
- Environmental impact management in agriculture
- Challenges in agri-food supply and systems in the current geopolitical context

## ¿How can I participate?

IN-PERSON OR VIRTUAL: **it is your choice**
