

From August 5th to 12th

Join a **technical tour** through the **Argentinian**  **Pampa region!**

Technical tour through the Argentinian Pampa región

Within the framework of the **XXXI Aapresid Congress**, we invite you to participate in a training tour on sustainable agricultural systems in the heart of Pampa, Argentina's main productive region. Here you can learn all about our productive models, **innovation leaders, soil care and sustainability**.

- **Real production systems** in the main productive regions of the country.
- **Technical exchange** with our local producers and experts.
- **Conservation Agriculture (CA)** and **Direct Sowing Systems (DSS)**.
- Agriculture for **Climate Change Mitigation and Adaptation**.
- **Always Green Agriculture:** a new production concept based on direct sowing: effective, protecting the environment and the people.

Target audience:

Farmers, technicians, university students, agribusiness organizations, political decision-makers / official delegations.

The tour includes:

Transportation, 7 accommodation nights, meals, bilingual technical guide (Spanish-English) and a ticket to the **XXXI Aapresid Congress**.

The place where
the **future of agriculture**
is written.

XXXI Aapresid Congress

Consolidated as the most outstanding event regarding knowledge and technology in agriculture in our country and an example worldwide, **a new edition of the Aapresid Congress is held in Rosario city these 9th, 10th and 11th of August.**

Every year, our Congress is the place where sustainability paradigms dialogue with agronomic, economic and political strategies to improve the lives of everyone. This is why, this year, the event will be a space to discuss the numerous strategies of **Carbon**. Why? Because in every parcel of cultivated land we own a **natural CO2 sequestering machine**, and the key to improving soils and fighting climate change.

Carbon is an essential element without which there would be no life on Earth. After subatomic particles, it is the minimum expression into which every plant, tree, forest, animal, ecosystem and every one of us can be divided. It is how our bodies are returned to Nature once we cease to exist. It is present in everything we touch, use, wear and eat. Carbon is opportunity, it is value.

It is said that a word to the wise is sufficient. **Today we raise the bet and tell them: to the wise, a single letter.**

This year, the Aapresid Congress is called C, and it is quite a symbol.
